SKILLS

- Node.js
- Git
- FastAPI
- REST APIs
- Python
- TypeScript
- CI/CD

EDUCATION

Associate Degree in
Computer Programming
Daniel University
01/2018 – 07/2021

PROFILE

Results-driven Site Reliability Engineer with a proven track record of ensuring high-availability, scalable, and secure cloud-based platforms. With 5+ years of experience in DevOps and software development, I leverage Node.js, Python, and TypeScript to design, implement, and optimize complex systems for UrbanGrid Mobility, BluePeak Consulting, and CoreStack Platforms.

EXPERIENCE

Site Reliability Engineer

CoreStack Platforms

06/2026 – Present

Utilized expertise in Node.js, Python, and TypeScript to develop scalable cloud-based platforms, ensuring high-availability and security. Collaborated with cross-functional teams to design and implement CI/CD pipelines, resulting in 30% reduction in mean time to recovery (MTTR). Spearheaded the migration of multiple applications to a containerized environment, achieving a 25% increase in deployment speed.

Software Engineer

UrbanGrid Mobility

04/2025 – 05/2026

Contributed to the development of REST APIs using Node.js and TypeScript, focusing on scalability and performance. Collaborated with DevOps engineers to design and implement CI/CD pipelines, ensuring efficient testing and deployment of software components.

DevOps Engineer

BluePeak Consulting

10/2021 – 02/2025

Streamlined software development workflows by implementing automated testing and deployment processes using Git and FastAPI. Collaborated with developers to design and implement CI/CD pipelines, resulting in a 20% reduction in mean time to deploy (MTTD).
