SUMMARY

Senior Software Engineer with a strong background in Full Stack Development, DevOps Engineering, and Backend Development. Proficient in multiple programming languages such as Python, JavaScript, and Java, with expertise in designing scalable and efficient software solutions.

EXPERIENCE

Senior Software Engineer

01/2023 – Present

Nexus Technologies

Designed and implemented a cloud-based platform for managing cross-functional teams, utilizing FastAPI to ensure seamless integration with existing systems. Spearheaded the development of multiple high-priority projects, leveraging expertise in Java, Python, and JavaScript to deliver scalable solutions. Collaborated closely with stakeholders to understand business requirements and developed tailored software applications to meet their needs.

Backend Developer

01/2022 – 12/2022

Silverline Insurance Tech

Developed a robust backend infrastructure for an enterprise-level insurance platform, utilizing Django to manage complex workflows and Node.js to integrate with various third-party services. Worked closely with the DevOps team to ensure seamless deployment and monitoring of the application.

Full Stack Developer

03/2018 – 09/2021

GreenEarth Logistics

Built a web-based logistics management system, utilizing TypeScript to create reusable and maintainable code. Designed and implemented multiple features, including real-time tracking and automated reporting, to improve operational efficiency and customer satisfaction.

DevOps Engineer

03/2016 – 12/2017

Cobalt Security

Implemented a continuous integration and deployment (CI/CD) pipeline using Python scripts and Jenkins, ensuring rapid and reliable deployment of software updates. Collaborated with the development team to optimize application performance and scalability.

EDUCATION

B.S. in Information Technology

Fox University

10/2012 – 12/2015

SKILLS

- FastAPI
- Java
- Django
- Node.js
- JavaScript
- Python
- TypeScript
