SUMMARY

Results-driven Senior Software Engineer with 4+ years of experience in designing and developing scalable, cloud-based microservices architecture using TypeScript, Python, and Kubernetes. Proven track record of successfully implementing CI/CD pipelines and REST APIs to drive business value.

EXPERIENCE

Senior Software Engineer

05/2023 – Present

Echo Communications

Designed and developed a cloud-based microservices architecture using TypeScript, leveraging Kubernetes for deployment and scaling. Implemented CI/CD pipelines to streamline application delivery and improve team efficiency. Collaborated with cross-functional teams to develop REST APIs and integrate with existing enterprise systems, enhancing overall system reliability and performance.

Software Engineer

02/2021 – 12/2022

Vertex Analytics

Contributed to the development of a data analytics platform using Python, focusing on building scalable microservices architecture. Implemented Git workflows for version control and collaborated with peers to deliver high-quality software products. Worked closely with stakeholders to design and develop REST APIs, driving business value through data-driven insights.

EDUCATION

B.S. in Statistics

05/2016 – 12/2020

Martin University

SKILLS

TypeScript

Python

Kubernetes

CI/CD

Git

REST APIs
