SKILLS

- C#
- System Design
- Kubernetes
- PostgreSQL
- React
- AWS
- REST APIs

EDUCATION

B.S. in Information
Systems
Hall University
10/2013 – 04/2017

PROFILE

Highly experienced Senior Software Engineer with a strong background in system design, DevOps, and frontend development. Proficient in leveraging C# and React to deliver scalable solutions for high-volume customer bases. Proven ability to lead cross-functional teams and drive enterprise-level projects forward.

EXPERIENCE

Senior Software Engineer

Northbridge Analytics

06/2023 – Present

Designed and developed multiple REST APIs utilizing C# and React, ensuring seamless integration with PostgreSQL databases. Led a team of DevOps engineers in deploying containerized applications on Kubernetes, resulting in improved application scalability and reduced downtime. Spearheaded the development of a cloud-based data analytics platform, delivering insights to drive business decisions.

Frontend Developer

Northbridge Analytics

10/2021 – 05/2023

Developed high-performing React applications for large-scale customer bases, ensuring responsive and intuitive user experiences. Collaborated with cross-functional teams to design and implement UI components, resulting in improved application usability and increased customer engagement.

DevOps Engineer

Northbridge Analytics

08/2018 – 09/2021

Implemented continuous integration and deployment pipelines using Kubernetes, reducing deployment time by 75%. Collaborated with developers to ensure seamless application rollouts, resulting in improved application quality and reduced errors.

Junior Software Engineer

Sterling Partners

05/2017 – 04/2018

Assisted senior developers in designing and developing software applications using C#. Contributed to the development of a cloud-based project management tool, improving team collaboration and productivity.
