SUMMARY

Highly experienced software engineer with 8+ years of expertise in designing, developing, and deploying scalable enterprise-level systems. Skilled in C#, Microservices, Docker, AWS, Python, React, and Java. Proven track record of delivering high-quality solutions that drive business value.

EXPERIENCE

Senior Software Engineer

Summit IT Services

08/2025 – Present

Spearheaded the development of a cloud-native architecture for a large-scale e-commerce platform, leveraging Microservices and Docker to ensure scalability and flexibility. Collaborated with cross-functional teams to design and implement APIs that integrated with existing systems, resulting in a 30% increase in customer engagement. Utilized AWS services to deploy and manage the infrastructure, ensuring high availability and reliability.

Full Stack Developer

Echo Communications

03/2021 – 01/2025

Contributed to the development of a cutting-edge telecommunications platform by building reusable React components and integrating them with a Python-based backend. Utilized Java to create data pipelines that processed high-volume customer data, resulting in improved analytics and insights. Collaborated with senior developers to design and implement scalable architecture for enterprise-level systems.

Software Engineer

Echo Communications

08/2017 – 02/2021

Played a key role in the development of a cloud-based contact center solution by building a C#-based CRM system that integrated with existing infrastructure. Utilized Docker to containerize and deploy microservices, ensuring high availability and reliability. Worked closely with QA engineers to design and implement comprehensive testing strategies.

EDUCATION

B.A. in Economics

Rodriguez University

04/2014 – 05/2017

SKILLS

C# | Microservices | Docker | AWS | Python | React | Java
