West Sherrifort, Saint Kitts and Nevis · heather.jordan@yahoo.com · 001-254-386-6906

---

## SUMMARY

*Highly motivated and detail-oriented developer with a strong foundation in computer science, utilizing expertise in Django, Git, Microservices, PostgreSQL, AWS, React, and Docker to drive business value and deliver high-quality solutions. With over 4 years of experience across junior, mid-level, and senior roles.*

## EXPERIENCE

### Full Stack Developer

10/2023 – Present

Quantum Leaf

Developed scalable microservices-based applications using Django and PostgreSQL, streamlining business processes and improving data integrity. Collaborated with cross-functional teams to design and implement robust APIs, ensuring seamless integration with existing systems. Utilized Git for version control and Docker for containerization, enabling efficient deployment and scaling of projects.

### Frontend Developer

05/2022 – 06/2023

Northbridge Analytics

Designed and implemented user-centered React-based interfaces, enhancing customer experiences and driving engagement. Leveraged Microservices architecture to develop modular and reusable frontend components, improving overall system maintainability and flexibility.

### Junior Software Engineer

11/2020 – 04/2022

Silverline Insurance Tech

Contributed to the development of a scalable insurance claims processing system using Django and PostgreSQL. Utilized Git for version control and worked closely with senior developers to integrate code changes, ensuring seamless deployment and scalability.

## EDUCATION

### B.S. in Computer Science

04/2016 – 08/2020

Payne University

SKILLS

- Django
- Git
- Microservices
- PostgreSQL
- AWS
- React
- Docker
