SUMMARY

Highly experienced Solutions Architect with a strong background in software engineering and expertise in leveraging React, TypeScript, C#, AWS, Go, REST APIs, and Django to drive business value. Proven track record of delivering scalable solutions across various industries.

EXPERIENCE

Solutions Architect

08/2025 – Present

BrightPath Health Tech

Designed and implemented a cloud-based health analytics platform utilizing React, TypeScript, and AWS, enabling data-driven decision-making for cross-functional teams. Streamlined API integrations, resulting in increased efficiency and reduced latency. Collaborated with stakeholders to identify key performance indicators and developed custom dashboards for real-time insights.

Senior Software Engineer

03/2022 – 05/2025

Pioneer Automation

Owned the development of a cloud-native IoT platform using C#, Go, and Django, which enabled real-time monitoring and predictive maintenance for high-volume customer bases. Implemented scalable architectures to support millions of devices, ensuring seamless integration with enterprise-level systems.

Backend Developer

06/2018 – 10/2021

CloudNine Systems

Contributed to the development of a RESTful API utilizing TypeScript and React, which enabled real-time customer engagement and analytics for high-growth startups. Collaborated on cross-functional teams to design and deliver scalable solutions, prioritizing performance, security, and maintainability.

EDUCATION

B.S. in Software Engineering

06/2013 – 03/2018

Trevino University

SKILLS

- React
- TypeScript
- C#
- AWS
- Go
- REST APIs
- Django
