SUMMARY

Highly experienced Senior Software Engineer with a strong foundation in electrical engineering and expertise in frontend development, microservices architecture, and containerization. Leveraging skills in SQL, JavaScript, Django, and Git to deliver scalable and efficient software solutions.

EXPERIENCE

Senior Software Engineer

12/2025 – Present

Fusion Retail Group

Designed and developed a cloud-based inventory management system utilizing microservices architecture and Docker containerization. Streamlined data processing and reduced latency by 30% through efficient SQL query optimization. Collaborated with cross-functional teams to ensure seamless integration across multiple platforms.

Frontend Developer

02/2022 – 11/2025

Quantum Leaf

Built a responsive and interactive web application using Django framework, JavaScript, and Git version control. Created reusable UI components and implemented automated testing to improve code quality and reduce bugs by 25%. Worked closely with designers to ensure visual design alignment.

Software Engineer

05/2020 – 09/2021

Silverline Insurance Tech

Contributed to the development of a Java-based insurance policy management system. Utilized SQL queries to optimize data retrieval and improved system performance by 15%. Collaborated with junior engineers to mentor and support project deliverables.

EDUCATION

B.S. in Electrical Engineering

06/2016 – 03/2020

Compton University

SKILLS

SQL

JavaScript

Django

Microservices

Git

Docker

Java
