SKILLS

- Go
- System Design
- REST APIs
- Node.js
- AWS
- FastAPI
- Microservices

EDUCATION

B.S. in Industrial Engineering
Chandler University
12/2013 – 11/2016

PROFILE

Highly motivated and experienced software professional with a strong background in system design, microservices architecture, and cloud-based solutions. With over 8 years of experience as a senior software engineer, I excel at designing and implementing scalable, reliable, and efficient systems that drive business value.

EXPERIENCE

Senior Software Engineer

Summit IT Services

06/2025 – Present

Spearheaded the design and implementation of multiple cloud-based microservices architecture for a leading e-commerce platform. Utilized expertise in Go, Node.js, and AWS to develop scalable and efficient systems that ensured high availability and reliability. Successfully led cross-functional teams to deliver projects on time, resulting in significant business value.

Software Engineer

Silverline Insurance Tech

11/2021 – 05/2025

Contributed to the development of a cloud-based policy management system using REST APIs, Node.js, and AWS. Collaborated with the team to design and implement scalable systems that ensured high performance and reliability. Successfully executed multiple projects, resulting in improved customer experience and increased business efficiency.

Site Reliability Engineer

CloudNine Systems

03/2018 – 07/2021

Played a key role in designing and implementing a cloud-based monitoring system using System Design principles. Utilized expertise in Go and AWS to develop scalable and efficient systems that ensured high availability and reliability. Successfully managed the team to ensure prompt resolution of production issues, resulting in increased customer satisfaction.

Full Stack Developer

Apex Digital

01/2017 – 12/2017

Developed a cloud-based web application using Node.js and FastAPI. Demonstrated expertise in microservices architecture by designing and implementing multiple services that ensured high performance, scalability, and reliability. Successfully delivered the project on time, resulting in significant business value.
