SUMMARY

Highly experienced software engineer with a strong background in designing and implementing scalable, cloud-based solutions. Leveraging expertise in microservices, PostgreSQL, Docker, and React to drive business value through efficient development and deployment.

EXPERIENCE

Senior Software Engineer

Horizon Software

04/2024 – Present

Led the development of a real-time analytics platform using microservices architecture, resulting in a 30% reduction in data processing time. Spearheaded the implementation of CI/CD pipelines to ensure seamless deployment and scalability. Collaborated with cross-functional teams to design and deliver high-volume customer-facing applications.

Site Reliability Engineer

Horizon Software

10/2022 – 03/2024

Played a key role in designing and implementing enterprise-level systems, ensuring 99.99% uptime for critical services. Utilized Docker and Kubernetes to containerize and orchestrate applications, resulting in improved resource utilization and reduced costs.

Backend Developer

Vantage ERP Solutions

01/2021 – 05/2022

Built scalable REST APIs using Python and PostgreSQL, enabling real-time data integration across multiple systems. Worked closely with the front-end team to develop React-based UI components, resulting in a 25% increase in user engagement.

Software Engineer

DataFlow Inc

08/2019 – 12/2020

Contributed to the development of a cloud-based data processing platform using microservices architecture. Utilized PostgreSQL and Python to design and implement efficient data processing pipelines, resulting in improved data quality and reduced processing times.

EDUCATION

M.S. in Information Systems

Hoffman University

12/2015 – 05/2019

SKILLS

Microservices | PostgreSQL | Docker | React | Python | REST APIs | CI/CD
