SKILLS

- Python
- Pandas
- Tableau
- Scikit-learn
- Data Visualization
- Apache Spark
- SQL

EDUCATION

B.S. in Software Engineering
Riviera University
03/2018 – 12/2021

PROFILE

Highly motivated and detail-oriented data professional with a strong foundation in software engineering, leveraging Python, Pandas, and Tableau to drive business insights. With over 3 years of experience as a Data Analyst, I excel at extracting valuable trends from large datasets, creating actionable reports for stakeholders.

EXPERIENCE

Data Analyst

GreenEarth Logistics

11/2025 – Present

Utilized Python and Pandas to process and analyze high-volume logistics data, developing data visualizations that informed business decisions. Successfully created dashboards and reports that improved supply chain visibility and reduced costs by optimizing routes. Collaborated with cross-functional teams to identify areas for process improvement, resulting in increased efficiency and customer satisfaction.

Junior Data Analyst

GreenEarth Logistics

01/2022 – 10/2025

Assisted senior analysts in data processing and analysis, utilizing Tableau to create interactive dashboards and reports. Applied Scikit-learn to develop predictive models that forecasted demand and optimized inventory management. Worked closely with stakeholders to identify key performance indicators (KPIs) and developed tailored reports to track progress.
